A
exact formula
B
approximate formula
measured ν_3 (median)
10^1
10^0
exact $\nu_3 = \varepsilon_0 + N\tilde{\phi}\frac{\tau}{\bar{\tau}}F_{ST}$
approximate $\nu_3 = N\tilde{\phi}F_{ST}$
$y = x$
varying F_{ST} (N=1000, $\tilde{\phi}$=0.25)
varying N (F_{ST}=0.0194, $\tilde{\phi}$=0.25)
varying $\tilde{\phi}$ (F_{ST}=0.0194, N=1000, $\phi_1 \neq \phi_2$)
varying $\tilde{\phi}$ & N (F_{ST}=0.0194, $\phi_1 = \phi_2$)
scatter (N, $\tilde{\phi}$, F_{ST} all varied)
